

# NOW OFFERING TELEMEDICINE!

As the coronavirus (COVID-19) continues to develop and limit day-to-day activities, we are happy to announce that **we now offer telemedicine consultations for select non-emergency services.**

Through telemedicine video appointments, you'll be able to discuss your pet's health and our doctors will be able to view physical ailments your pet may have...all from the safety of your home.

Telemedicine is an excellent extension of hospital capabilities which we are excited to offer to our pet parents.

Our staff is here to answer any telemedicine questions you may have as well as scheduling appointments.
